Headline

wide in 12/14 Times
Roman. I even al-
low some *emphasised*

term, set in Times-Italic. The TeX hyphenation algorithm is also implemented. I have also some *cursive text* and an example of an Erlang term. The term {person, \"Joe\"} is an Erlang term. The variable X, was immediately followed by a comma. The justification algorithm does proper *kerning*, which is more than *Microsoft Word* can do. AWAY again is correctly kerned! Erlang terms {like, this} are typeset in *courier*.
